

Fig. 1

Fig. 2

FIG. 3 is a schematic diagram of a system 100 for controlling a vehicle 102. The system 100 includes a processor 104, a memory 106, a sensor 108, and a control unit 110. The processor 104 is configured to receive data from the sensor 108 and to control the vehicle 102 based on the data. The memory 106 is configured to store data received from the sensor 108 and to provide data to the processor 104. The sensor 108 is configured to sense a condition of the vehicle 102 and to provide data to the processor 104. The control unit 110 is configured to control the vehicle 102 based on data received from the processor 104.
